Riot Games   November 21, 2020
Internships

Dear Hiring Manager,

It is with great enthusiasm that I submit my application for the position of UX Design Intern for the internship department at Riot Games. As a newly minted developer and a long time player of both League of Legends and most recently Team Fight Tactics, I am so excited to have the opportunity to contribute to a company and projects that have brought me so much joy over the years.

As you will see from the attached resume, I've built my career in a variety of roles and industries, in both small and large companies. A large portion of my professional career has centered around the gaming industry and I hope to move over into the digital space to join the game industry as an engineer.

In addition to being flexible and responsive, I'm also a big believer in a growth mindset. When I was laid off in March of 2020 due to the pandemic, I immediately jumped into coding and saw this as a new challenge to overcome. I self studied for two months before committing to a full time coding bootcamp to prove to myself that I had the capability and capacity to learn this kind of material. I have learned a lot about both front and back end engineering learning HTML,CSS, and Javascript for the front end and NodeJS-Express and Python-Flask for the back end.

In closing, I am thrilled at the possibility of being involved with Riot Games in any capacity, and would love the opportunity to meet with you and discuss the value that I can bring to the Riot Games and the current Projects that need assistance.

I appreciate your consideration and look forward to hearing from you.

Warmest Regards,

Alejandro Martinez
